GP EDUCATION SERIES: CANCER GENOMIC MEDICINE

RACGP CPD Approved Activity — Educational Activities 1.5 hours

Cancer care is changing - are you ready?

Genomic medicine is reshaping diagnosis and treatment, and GPs are at the centre of this shift. Patients now look to their doctors for guidance on germline testing, molecular reports, and targeted therapies.
Understanding these concepts means better care, confident answers, and timely referrals that make a real difference.

LEARNING OUTCOMES

- Describe cancer genomics, the impact on therapy and the importance of germline cancer risk
- Describe the new technologies that make somatic and germline sequencing affordable and rapid
- Demonstrate how targeted therapy based on genomics can impact patient care

EVENT DETAILS

Thursday 26 February 2026

Peninsula Kingswood Country Golf Club

211-279 Skye Rd, Frankston VIC 3199

6:00 PM - 9:00 PM

Sit-down dinner and refreshments provided

On-site parking available

RSVP

er@paso.com.au
or via QR code
by Thursday 12 February 2026

SPEAKERS

Dr Neil Watkins
Cancer Researcher

Cancer diagnosis:
Beyond tissue type, the genomics of cancer and heritable cancer risk

Dr Vivek Rathi
Molecular and Anatomical Pathologist

Molecular pathology: a rapid evolution of technology

A/Prof Vinod Ganju
Medical Oncologist

Personalised Cancer Therapeutics

Organised by:
PASO Medical
